

Lesson 5 Practice Problems

1. The cell phone plan from Company C costs \$10 per month, plus \$15 per gigabyte for data used. The plan from Company D costs \$80 per month, with unlimited data.

Rule C gives the monthly cost, in dollars, of using g gigabytes of data on Company C's plan. Rule D gives the monthly cost, in dollars, of using g gigabytes of data on Company D's plan.

- Write a sentence describing the meaning of the statement $C(2) = 40$.
- Which is less, $C(4)$ or $D(4)$? What does this mean for the two phone plans?
- Which is less, $C(5)$ or $D(5)$? Explain how you know.
- For what number g is $C(g) = 130$?
- Draw the graph of each function.

2. Function g is represented by the graph.

For what input value or values is $g(x) = 4$?

- A. 2
- B. -2 and 2
- C. 16
- D. none

3. Function P gives the perimeter of an equilateral triangle of side length s . It is represented by the equation $P(s) = 3s$.

a. What does $P(s) = 60$ mean in this situation?

b. Find a value of s to make the equation $P(s) = 60$ true.

4. Function G takes a student's first name for its input and gives the number of letters in the first name for its output.

a. Describe the meaning of $G(\text{Jada}) = 4$.

b. Find the value of $G(\text{Diego})$.

(From Unit 4, Lesson 2.)

5. W gives the weight of a puppy, in pounds, as a function of its age, t , in months.

Describe the meaning of each statement in function notation.

a. $W(2) = 5$

b. $W(6) > W(4)$

c. $W(12) = W(15)$

(From Unit 4, Lesson 3.)

6. Diego is building a fence for a rectangular garden. It needs to be at least 10 feet wide and at least 8 feet long. The fencing he uses costs \$3 per foot. His budget is \$120.

He wrote some inequalities to represent the constraints in this situation:

$$f = 2x + 2y \qquad x \geq 10 \qquad y \geq 8 \qquad 3f \leq 120$$

- a. Explain what each equation or inequality represents.

- b. His mom says he should also include the inequality $f > 0$. Do you agree? Explain your reasoning.

(From Unit 2, Lesson 18.)
