

## Lesson 5: A New Way to Interpret $\boldsymbol{a}$ over $\boldsymbol{b}$

## **Cool Down: Choosing Solutions**

Select **all** the expressions that are solutions to  $5 = \frac{2}{3}x$ .

- $5 \cdot \frac{2}{3}$
- $\bullet \quad \frac{5}{\frac{2}{3}}$
- $5 \div \frac{2}{3}$
- $\bullet \ \frac{15}{2}$
- $\frac{10}{3}$
