## Lesson 11: Representing Ratios with Tables <br> Cool Down: Batches of Cookies in a Table

In previous lessons, we worked with a diagram and a double number line that represent this cookie recipe. Here is a table that represents the same situation.

| flour (cups) | vanilla (teaspoons) |
| :---: | :---: |
| 5 | 2 |
| 15 | 6 |
| $2 \frac{1}{2}$ | 1 |
|  |  |

1. Write a sentence that describes a ratio shown in the table.
2. What does the second row of numbers represent?
3. Complete the last row for a different batch size that hasn't been used so far in the table. Explain or show your reasoning.
