

## **Lesson 16: Solving More Ratio Problems**

## **Cool Down: Pizza-making Party**

You are having a pizza-making party for a number of people. You will need 6 ounces of dough and 4 ounces of sauce for each person at this party. If you used a total of 130 ounces of dough and sauce all together,

unces of dough and sauce all together,	
1. How many ounces of dough were used at the party?	
2. How many ounces of sauce were used at the party?	
3. How many people were at the party?
