

Unit 5 Lesson 17: Annually, Quarterly, or Monthly?

1 Finding Equal Expressions (Warm up)

Student Task Statement

1. Find pairs of expressions that are equal. Be prepared to explain how you know.

$$(3^5)^2$$

$$(3 \cdot 3 \cdot 3 \cdot 3 \cdot 3) \cdot (3 \cdot 3)$$

$$3 \cdot 3 \cdot 9 \cdot 9 \cdot 9$$

$$3^6$$

$$(3^2)^4$$

$$3^7$$

$$3^{10}$$

$$3 \cdot 9 \cdot 27$$

2. Write an expression that is equal to $(2^{30})^7$ using a single exponent.
3. Without evaluating the expressions, explain why 2^{15} is equal to 8^5 .

2 How Many Times Per Year?

Student Task Statement

1. Complete the table.

If something happens...	It happens this many times a year...	It happens every _____ months...
annually		
semi-annually		
quarterly		
monthly		

2. A gym membership has an annual fee, billed monthly. How much is each bill, if the annual fee in dollars is . . . ?
- a. 360
 - b. 540
 - c. g
3. An educational foundation gives an annual scholarship, distributed semi-annually. How much is each distribution, if the annual scholarship amount in dollars is . . . ?
- a. 1,800
 - b. 5,000
 - c. s
4. A magazine subscription has an annual price, billed quarterly. How much is each bill, if the annual price in dollars is . . . ?
- a. 48
 - b. 80
 - c. m

3 Your Problems Are Compounded

Student Task Statement

Match each item in the first column to a representation in the second column.

1. A worker sets aside \$6,000 per year for their retirement fund by saving the same amount monthly.

A. $6,000 \cdot 1.21^3$

2. A business's revenue increases by 20% per quarter. This happens for 2 years. Initially, their quarterly profit was \$6,000.

B.

x	0	1	2	3	4	5
y	6,000	7,200	8,640	10,368	12,442	14,930

3. $6,000 \cdot ((1.05)^4)^x$

C. $6 \cdot (3^4)^2$

4. A man borrows \$6,000 from his sister. He will reduce the amount he owes in 1 year by paying her back quarterly.

D.

x	0	1	2	3	4	5
y	6,000	4,800	3,840	3,072	2,457.6	1,966.1

5. A business's revenue decreases by 20% semi-annually. This happens for 3 years. Initially, their quarterly revenue was \$6,000.

E. $6,000 \cdot 1.2155^x$

6. The number of subscribers to a website triples quarterly for 2 years. Initially there were 6 subscribers.

F. $6 \cdot 4,096^2$

$$7. 6,000 \cdot ((1.1)^2)^3$$

G.

8. The number of likes on a post was 6, and then for the next 2 years, the number of likes doubled, monthly.

H.
