

Lesson 10: Multiply!

Cool Down: Making Mistakes

Noah was doing some homework and answered the following questions. Do you agree with his answers? If you disagree, explain your reasoning.

1. $2.7 \cdot -2.5 = -6.75$

2. $-\frac{3}{4} \cdot -\frac{5}{7} = -\frac{15}{28}$

3. $5.5 \cdot -\frac{3}{5} = 3.3$
