

## Lesson 14: Multiplying, Dividing, and Estimating with Scientific Notation

## **Cool Down: Estimating with Scientific Notation**

1. Estimate how many times larger  $6.1 \times 10^7$  is than  $2.1 \times 10^{-4}$ .

2. Estimate how many times larger  $1.9 \times 10^{-8}$  is than  $4.2 \times 10^{-13}$ .
