

Lesson 18: Subtraction in Equivalent Expressions

Cool Down: Equivalent to $4 - x$

1. Select **all** the expressions that are equivalent to $4 - x$.
 - a. $x - 4$
 - b. $4 + -x$
 - c. $-x + 4$
 - d. $-4 + x$
 - e. $4 + x$
2. Use the distributive property to write an expression that is equivalent to $5(-2x - 3)$. If you get stuck, use the boxes to help organize your work.
